#### DETAILED ACTION

### Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 60-91, drawn to a dendritic polymer.

Group II, claim(s) 92-95 and 98-103, drawn to a method of preparing a phosphonic terminated dendritic polymer through addition of a dialkyl phosphonic to a double bond.

Group III, claim(s) 92, 93, 96 and 97, drawn to a method of preparing a phosphonic terminated dendritic polymer through substitution of terminal groups.

Group IV, claim(s) 104-109, drawn to a phosphonic compound.

Group V, claim(s) 110-114, drawn to a method of preparing a phosphonic compound.

Group VI, claim(s) 115-118, drawn to a method of use for a phosphonic terminated dendritic polymer.

- 2. The inventions listed as Groups I-VI do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:
- Groups I-III and VI do not share a common technical feature with Groups IV and
  The common technical feature of Groups I-III and VI is the dendritic polymer with phosphonic terminal groups which is not present in Groups IV and V. The common

technical feature of Groups IV and V is the composition of formula (VIII) which is not present in Groups I-III and VI.

- 4. Groups I-III and VI share the share the common technical feature of a dendritic polymer with phosphonic terminal groups. This element cannot be a special technical feature under PCT Rule 13.2 because the element is shown in the prior art. Matthews et al. (US 6,464,971 B1) teach dendritic polymers having phosphonic terminals (column 3 lines 42-44; column 5 lines 5, 25; column 6 line 38).
- 5. Groups IV and V share the common technical feature of the composition of the compound of formula (VII). This element cannot be a special technical feature under PCT Rule 13.2 because the element is shown in the prior art. Kagaku (JP 05 178 710) teaches hydroxyl-trichloroethyl-O,O-dimethylphosphonate (abstract) which anticipates formula (VIII).
